Skills

HTML • CSS • JavaScript • React • Tailwind • Responsive Design
• Django (learning) • AWS Educate • Docker
Manual testing • Bug fixing • Git/GitHub
UI/UX basics • Wireframing • CapCut editing
Teamwork • Documentation • Enactus & JCI
Prompt engineering • AI workflow tools • ALX AICE

Experience

I'm a Front-End Developer and UI/UX Designer passionate about building clean, intuitive, and modern digital experiences. I specialize in **PHP, JavaScript, HTML, CSS, and Tailwind CSS**, and I'm currently expanding into backend development with **Laravel** and **Django**, as well as cloud technologies through **AWS**.

I enjoy crafting user-centered interfaces, optimizing performance, and transforming ideas into polished, functional products. I've worked on **AI-powered platforms, virtual card systems, DevOps/CloudNative student projects, and productivity-focused tools**. My process blends creativity with technical precision — from design mockups to fully deployed applications.

I'm also part of several impactful tech communities, including **Enactus BUK, JCI, and AWS Cloud Club, Google developer Group** where I collaborate, teach, and contribute to real-world solutions.

Education

Bayero University Kano/ Information Technology

Learning software development, cloud fundamentals, and problem-solving through hands-on projects and tech communities.

ALX / AI Career Essentials

Gained foundational knowledge in Artificial Intelligence,, and data-driven decision-making.learned how to apply AI tools for productivity, automation, and problem-solving.

Completed hands-on exercises involving prompt engineering and AI-assisted workflows.
